

Product Number: 57

FB70 Fire Barrier Curtain

Description:

FB70 is a 1.2mm thick x 1220mm wide reinforced glass cloth impregnated with yellow Envirograf® insulation coating, giving up to 81 minutes fire integrity. An acoustic version (FB70/AC) approximately 17mm thick is available with Envirograf® sponge adhered to one face of the cloth, meeting, meeting the airborne and impact sound requirements of Document E of UK Building Regulations. If more insulation is required, see Envirograf® Product 54.

Use:

For use in loft areas, from ceilings to the top of partitions, under computer floors, or for wrapping around trunking, steel and wood. Joints should overlap by 50mm and be adhered with the supplied adhesive and fixed with Envirograf® metal straps (FB/C1) the straps can be cut with metal snips. Openings can be made in the barrier for access doors or drop vents.

Performance:

Tested to BS476 Part 22 (1987), achieving 81 minutes integrity and 22 minutes insulation.
