

Product Number: 103

ENVIROGRAF® COATING KITS FOR THE RESTORATION OF DOORS

Description:

Water based clear or white intumescent coating kit for upgrading raised-and-fielded doors to fire door status. Each kit contains ½ litre of primer, 1½ litres of intumescent coating and ½ litre of top coat – enough to cover an area of 6m² (depending on the size of the door this may be enough material to cover three to four sides of a door.) Kits can be coloured to BS or RAL colours (extra charge applies.)

Use:

Only the risk side needs to be coated on room doors and both sides of doors leading onto corridors or at the top of stairs. There is no need to remove any existing paints, varnish or gold leaf; this product can be applied directly over all previous coatings after normal surface washing.

NOTE: Doors must have a minimum 8mm thick fielded area and 28mm thickness stiles and rails. If you are unsure whether your doors are suitable please contact the Technical Department.
